STARTS

## WHAT YOU'LL LEARN

- ✓ Smart Insights & Smart Discovery
- ✓ Predictive (time-series) forecasting & anomaly detection
- ✓ Analytics Designer foundations & custom widget architecture
- ✓ Advanced scripting: dynamic variables, events, conditional logic
- ✓ Performance-optimized, fully scripted interactive applications
- ✓ Advanced driver-based planning & scenario modeling

## WHY THIS COURSE

### Expert-level range

The parts of SAC that separate a confident user from a true specialist.

### Real forecasting work

Build forecasts & anomaly detection on real business datasets.

### Built for consultants

Depth that clients actually pay a premium for.
